Aajkaal - 28/05/2019

incremental growth has been slow.

The government has set a target of achieving 60 GW of wind power by 2022.

"The lowest tariff of ₹2.42 per unit was recorded a couple of years ago. But that cannot become the benchmark for pricing today since there was a equipment glut and the demand was lower at that time," he said.

Pricing could be about ₹3 a unit, which is still lower by about ₹2 a unit procured by various States.

Kymal said, "The country is a promising market for hybrid projects as we have many States rich in both wind and solar energy resources. Optimal utilisation of resources and complimentary nature of wind and solar outputs is the main driver. If these are coupled with energy storage, hybrids can become a source of firm power."

Kymal said there is a need to ensure wind and solar projects do not get concentrated in some pockets of the country.
