* for Warranty T & C Apply

Louvers Installation Process

Tools Required:

- Measuring tape and saw
- Adhesive (Nail Free Glue/Silicon Sealant)
- SS Louvers Clips and Screws

1. Measure & Cut: Measure your wall space and cut louvers to size with minimal waste. (Note- Test-fit first. Hold the panels against your wall marks to verify alignment and adjust for a tight fit before final installation)

2. Apply Adhesive: Apply Nail Free Glue/Silicon Sealant directly to the back of the louver panel. Place the panel on the wall and hold until the silicone sealant has settled.

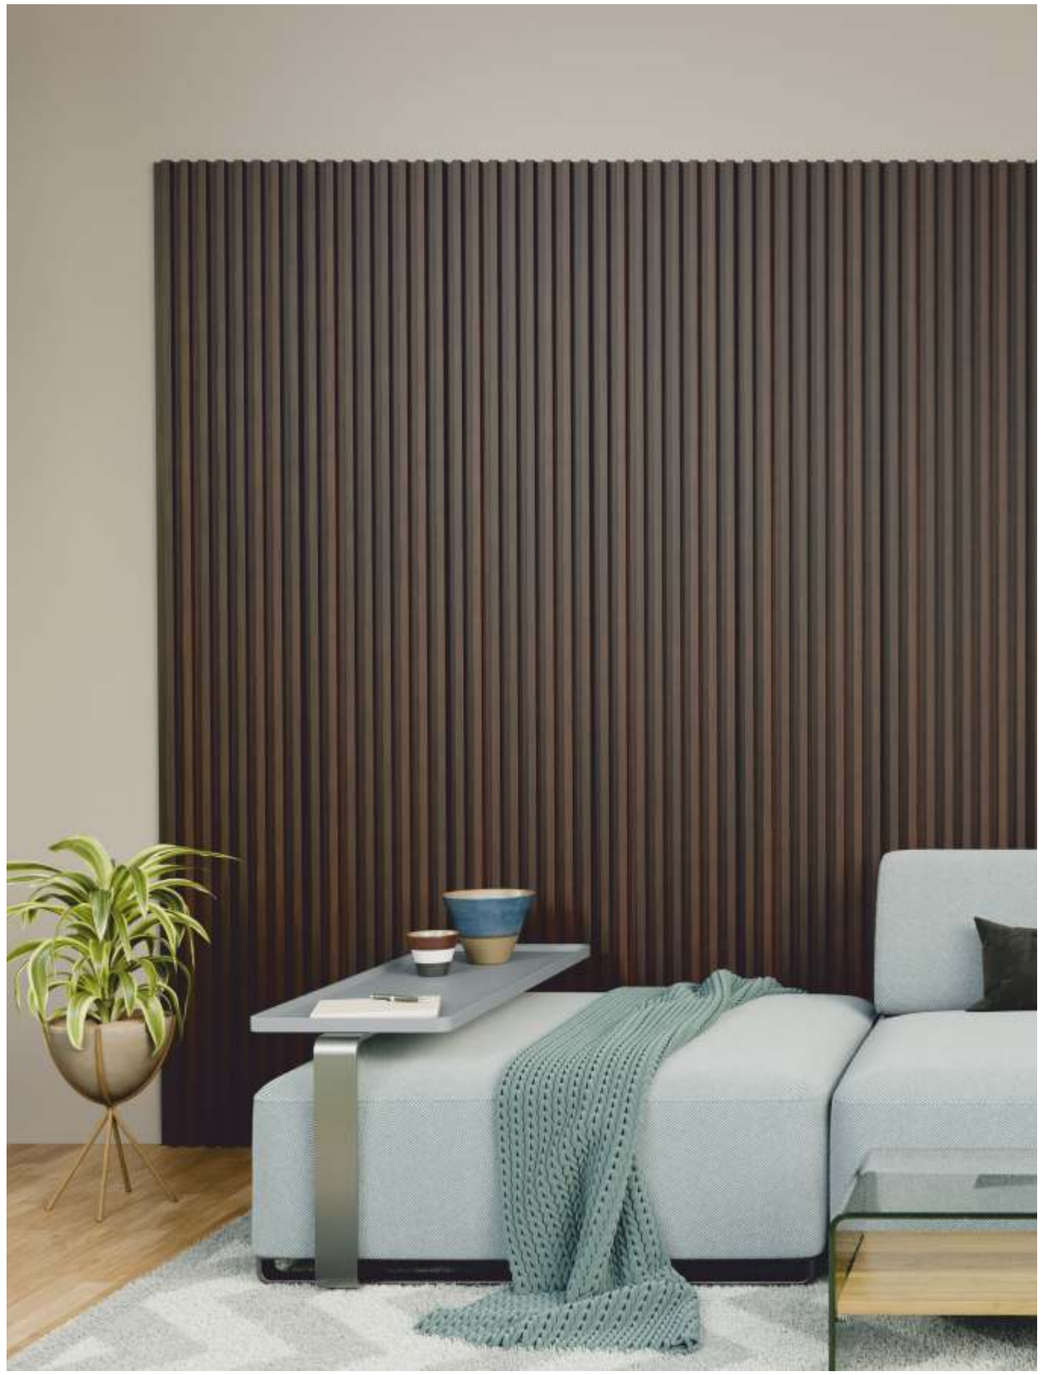

3. Clip Attachment: : Attach fastener clips to the panels. Screw the fastener clips using metal screws. Note- Secure the panel by installing two fastener clips per meter using metal screws.

4. Interlocking: Place the next panel and lock the panel into the fastener clip. Enjoy an instant transformation with no drying time. Finish edges and corners using appropriate corner profiles Designed for efficiency, Century Composite Select Series Louver Panels ensure effortless positioning and rapid project turnaround.
